

35 GHz Ranging Sensor Head, Single Channel, Long Range

Description:

Model SSD-35300-29L-S1 is Ka Band, lens antenna-based ranging sensor head that is designed and manufactured for **long range** measurements of a moving or stationary target's range and speed. The sensor head has a center frequency of 35 GHz and takes a nominal bias of +5.0 VDC/250 mA. The frequency modulation bandwidth of ± 75 MHz minimum is realized via a tuning voltage of 0 to +20 Volts. The sensor heads are configured with a lens corrected antenna, T/R diplexer, a single channel receiver and a transmitter/receiver oscillator in an integrated package. Sensor heads with a dual receiver are offered

under model number **SSD-35300-29L-D1** and can also detect the direction of a target in addition to the range and speed.

Features:

- 35.00 GHz Operation
- Low Flicker Noise and High Sensitivity
- Low Harmonic Emission

Applications:

- Traffic Management Systems
- Microwave Fence
- Military Surveillance Systems
